## Rubber Industrial Razors \& Knives

4
AMERICANCUTTING EDGE

American Cutting Edge Founded in 1965, American Cutting Edge (ACE) makes industrial knives and blades for a wide variety of applications globally including rubber and tire manufacturing. Customers count on our circular knives, razor blades and knives, and hand knives to help them improve profitability through greater lifetime and fewer blade changes. ACE offers in-stock options and custom blades engineered to your exact requirements in a variety of steels, powdered metals, and coatings.

## Circulars and Straight Blades for Rubber Operations

ACE offers a variety of circular and straight machine blades and knives for cutting, slitting and trimming rubber. Our team of industrial knife and blade experts work with customers to determine the best material and coating to meet cutting application requirements.

From off-the-shelf and in-stock options to custom designed solutions, ACE has the capability to provide exactly what you need to improve productivity and reduce costs.

## Hand Knives for Rubber Operations

Widely used on the shop floor by maintenance, ACE's selection of hand knives provide users with an accurate and quick edge just when they need it - no matter where they are.
